

MAY 6-8, 2019
HERRENHAUSEN PALACE, HANOVER, GERMANY

URBAN AGRICULTURAL HERITAGE – AND THE SHAPING OF FUTURE CITIES

Given the global challenges of urbanization and limited resources, Urban Agriculture has become an important tool for a sustainable planning of cities since the Millennium. However, it is mostly unknown, that Urban Agriculture already has its history. This is where the Herrenhausen Conference on Urban Agricultural Heritage starts from. It aims at providing a first global survey of projects and initiatives dealing with traditional forms of food production in cities and shall lead to a better understanding and academic awareness of the issue. Experts from science, international organizations, and civil society will approach the Conference's theme from different angles. Reasons will be identified why valuable agricultural heritage must not be neglected or even destroyed. Based on this, the Conference organizers look forward to elaborating new perspectives for research and management in the field of urban agriculture.

"Urban Agricultural Heritage – and the Shaping of Future Cities" is part of the Herrenhausen Conference Series initiated by the Volkswagen Foundation.

There is no fee for the attendance, but registration is essential.

Please visit www.volkswagenstiftung.de/urban-agricultural-heritage for more information.

PROGRAM

Monday, May 6th, 2019
